## 1 Important Notes

Solid state equipment has operational characteristics differing from those of electromechanical equipment.

Safety Guidelines for the Application, Installation and Maintenance of Solid-State Controls describes some important differences between solid state equipment and hard-wired electromechanical devices.

Because of this difference, and because of the wide variety of uses for solid state equipment, all persons responsible for applying this equipment must satisfy themselves that each intended application of this equipment is acceptable.

In no event will HITACHI be responsible or liable for indirect or consequential damages resulting from the use or application of this equipment.

The examples and diagrams in this manual are included solely for illustrative purposes. Because of the many variables and requirements associated with any installation, HITACHI cannot assume responsibility or liability for actual use based on the examples and diagrams.

### Warning!

- ✓ **If you don't follow the directions, it could cause a personal injury, damage to the equipment or explosion**
- ✓ Do not assemble the products and wire with power applied to the system. Else it may cause an electric arc, which can result into unexpected and potentially dangerous action by field devices. Arching is explosion risk in hazardous locations. Be sure that the area is non-hazardous or remove system power appropriately before assembling or wiring the modules.
- ✓ Do not touch any terminal blocks or IO modules when system is running. Else it may cause the unit to an electric shock or malfunction.
- ✓ Keep away from the strange metallic materials not related to the unit and wiring works should be controlled by the electric expert engineer. Else it may cause the unit to a fire, electric shock or malfunction.

### Caution!

- ✓ **If you disobey the instructions, there may be possibility of personal injury, damage to equipment or explosion. Please follow below Instructions.**
- ✓ Check the rated voltage and terminal array before wiring. Avoid the circumstances over 50°C of temperature. Avoid placing it directly in the sunlight.
- ✓ Avoid the place under circumstances over 85% of humidity.
- ✓ Do not place Modules nearby inflammable material. Else it may cause a fire.
- ✓ Do not permit any vibration approaching it directly.
- ✓ Go through module specification carefully, ensure inputs, output connections are made with the specifications. Use standard cables for wiring.
- ✓ Use Product under pollution degree 2 environment.

## 1.1 Safety Instruction

### 1.1.1 Symbols

<b>DANGER</b>	 Identifies information about practices or circumstances that can cause an explosion in a hazardous environment, which may lead to personal injury or death property damage, or economic loss.
<b>IMPORTANT</b>	Identifies information that is critical for successful application and understanding of the product.
<b>ATTENTION</b>	 Identifies information about practices or circumstances that can lead to personal injury, property damage, or economic loss. Attentions help you to identify a hazard, avoid a hazard, and recognize the consequences.

### 1.1.2 Safety Notes

<b>DANGER</b>	 The modules are equipped with electronic components that may be destroyed by electrostatic discharge. When handling the modules, ensure that the environment (persons, workplace and packing) is well grounded. Avoid touching conductive components, such as the G-BUS Pin.

Nominal Input Impedance	26.5 kΩ Typical
Frequency Range	60Hz
Common Type	4 Points / 4 Common (L2/N)
<b>General Specification</b>	
Power Dissipation	Max. 30mA @ 5Vdc
Isolation	I/O to Logic: Photocoupler Isolation
UL field power	Supply voltage: 24Vdc nominal, Class 2
Field Power	Field Power passes through to the next module. Supply Voltage: 24Vdc Voltage Range: 15 ~ 30Vdc (AC Power Not Used)
Wiring	I/O Cable Max. 2.0mm <sup>2</sup> (AWG 14)
Torque	0.8Nm (7lb-in)
Weight	57g
Module Size	12mm x 99mm x 70mm

## 5 Mounting

**Caution!**

**Hot surface!**

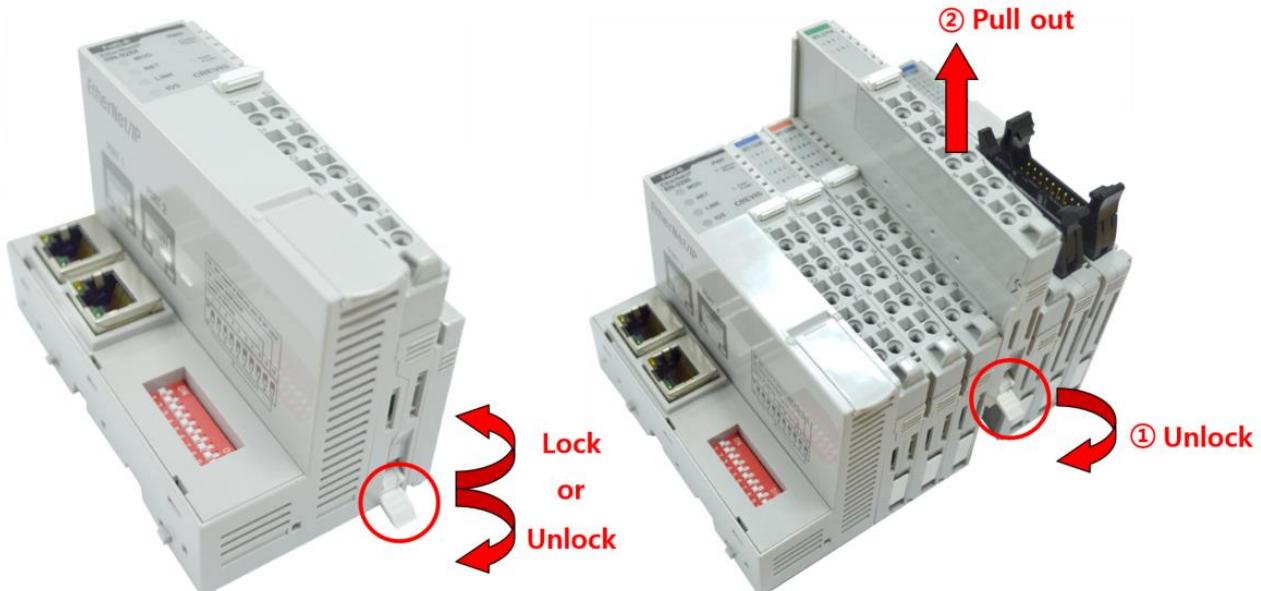

The surface of the housing can become hot during operation. If the device was operated at high ambient temperatures, allow it to be cool before touching it.

**Notice!**

**Perform work on devices only if they are de-energized!**

Working on energized devices can damage them. Therefore, turn off the power supply before working on the devices.

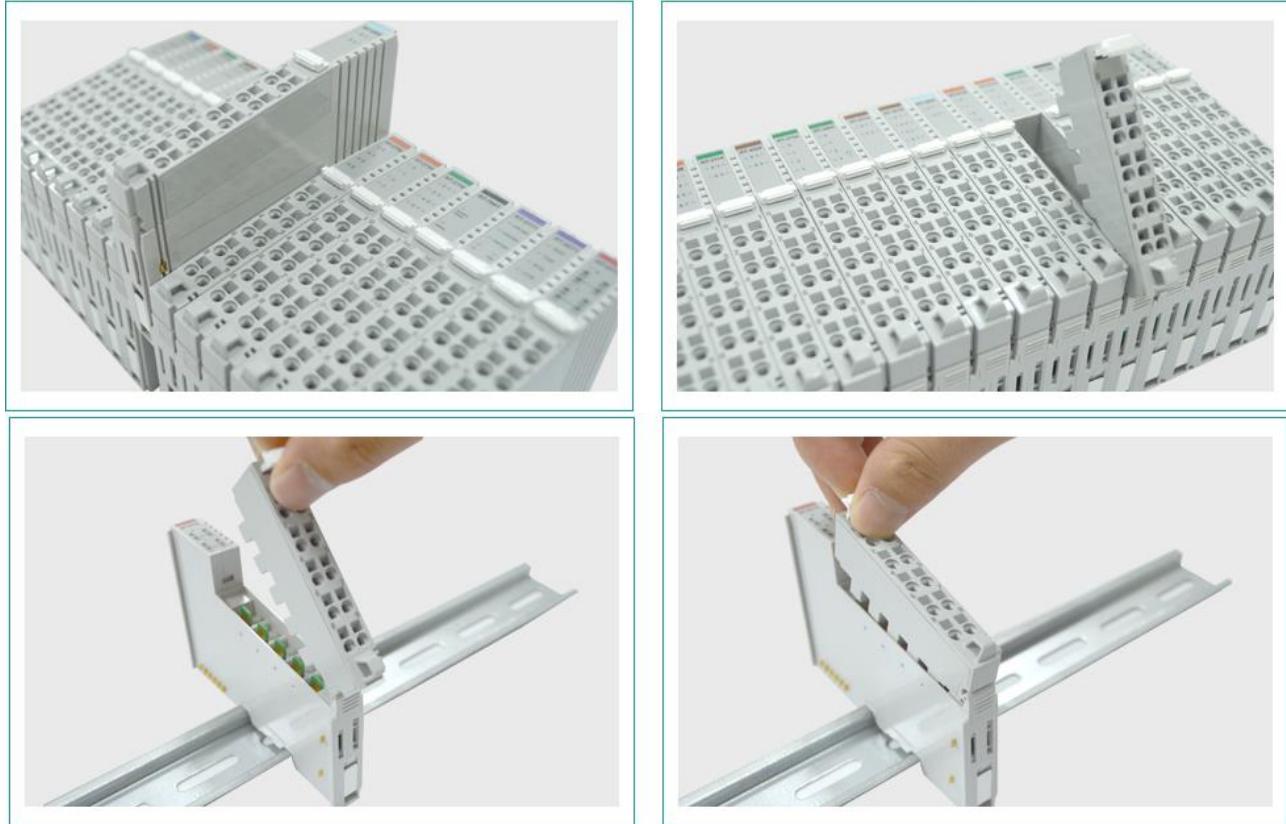

### 5.1 I/O Inserting and Removing Devices

As above figure in order to safeguard the RIO3-Series module from jamming, it should be fixed onto the DIN rail with locking lever. To do so, fold on the upper of the locking lever.

To pull out the HX-RIO3 module, unfold the locking lever as below figure.

## 5.2 RTB (Removable Terminal Block)

Whole terminal block can be combined and removed for the convenience.

There is a locking switch on the RTB for the easy combination and easy removal.

Easy combination and easy removal for I/O modules on the DIN rail through One Touch Locking Switch.

## 6 G-Bus Pin Description

Communication between the Network Adapter and the expansion module as well as system / field power supply of the bus modules is carried out via the internal bus. It is comprised of 6 data pin and 2 field power pins.

\*Please refer to the table below regarding the pin description from P1 to P8.

No.	Description
P1	Field Power (VCC)
P2	Field Power (GND)
P3	G-BUS CLK
P4	G-BUS MISO
P5	G-BUS MOSI
P6	G-BUS Token
P7	System Power (GND)
P8	System Power (VCC)

### DANGER

Do not touch data and field power pins in order to avoid soiling and damage by ESD noise.

## **APPENDIX A**

### **A.1. Product List**

Please refer the separate HX-RIO3 product list document

### **A.2. Glossary**

System Power: The power for starting up CPU.

Field Power: The power for input and output line.

Terminator Resistor: Resistor for prevention reflected wave.

EDS: Electronic Data Sheet.

Sink: The method of in/output power supply if a device has no power source.

Source: The method of in/output power supply if a device has the power source.
