

# Introducing Warranty Plus<sup>+</sup>

Product reliability has significant implications for production, safety, financial and environmental performance

To offer customers additional peace of mind, Inverter Drives now provides an extended warranty service.

**5 Years**  
Warranty Plus<sup>+</sup>

**5 Years**  
Warranty Plus<sup>+</sup>

Warranty Plus<sup>+</sup> extends the standard warranty to 5 years on all products manufactured by Inverter Drives for an additional 12% on the product list price

Return to service base for repair or replacement drive offered (if repair is uneconomical)

All repairs undertaken by approved Inverter Drives Service Centres to ensure the equivalent specifications of the original manufacture are maintained

**Tel:** +44 (0)1938 556868  
**Email:** [service@inverterdrives.com](mailto:service@inverterdrives.com)

## Terms

Warranty Plus<sup>+</sup> extends Inverter Drives' standard warranty to 5 years. Your local service centre will be able to advise if a repair is viable, or a replacement product is required. If a repair is not economically viable, Inverter Drives will manufacture and ship a replacement product on receiving the faulty drive.

In both cases, Inverter Drives will arrange for shipping costs

to Inverter Drives' UK HQ. If a replacement product is required, the product owner is responsible for re-installation, connection and commissioning.

Full terms and conditions of the standard warranty are available on request. Please contact your local sales partner for details.

## Global Engineered Support

Inverter Drives offers a wide range of product and technical support to its global sales partners and end users.

Please contact your local service centre (details on our website) or email [service@invertekdrives.com](mailto:service@invertekdrives.com) for further assistance.

## Exclusions

Warranty Plus<sup>+</sup> is only valid if the following conditions are met:

- The product has not been electrically altered, misused, accidentally damaged or repaired by an unauthorised party
- The product has been correctly installed, as per the specification in the appropriate user guide
- The product has been correctly stored
- The product has been properly packaged for return to Inverter Drives
- The product has not been damaged in transit
