

MOTORTRONICS™

Solid State AC Motor Control

VMX-Synergy Plus™

IEC - QUICK START GUIDE

200 - 600V, 17 - 850Amps

- Removable 3.5" Color Touch Screen rated IP66/N4X
- 42 Smart Application profiles - easy setup in 1 minute
- Auto Pedestal to control spinning motors
- Built-in iERS – intelligent Energy Recovery System
- Advanced motor protection with memory
- Life Time Event Logging Diagnostics
- Metering for power, voltage and current
- Integral Bypass

Safety

Important information

Installers should read and understand the instructions in this guide prior to installing, operating and maintaining the soft start. The following symbols may appear in this guide or on the soft start to warn of potential hazards or to draw attention to certain information.

Dangerous Voltage

Indicates the presence of a hazardous voltage which could result in personal injury or death.

Tension dangereuse

Indique la présence d'une tension dangereuse qui peut entraîner des blessures ou la mort.

Warning/ Caution

Indicates a potential hazard. Any instructions that follow this symbol should be obeyed to avoid possible damage to the equipment, and personal injury or death.

Avertissement/Mise en garde

Indique un danger potentiel. Toutes les instructions suivant ce symbole doivent être observées, afin d'éviter les dommages de l'équipement et les blessures ou la mort.

Protective Earth (Ground)

Indicates a terminal which is intended for connection to an external conductor for protection against electric shock in case of a fault.

Mise à la terre (Masse)

Indique une borne dont l'usage prévu est d'être connecter à conducteur externe pour assurer la protection contre les chocs électriques en cas de défauts.

Caution Statements

The examples and diagrams in this manual are included solely for illustrative purposes. The information contained in this manual is subject to change at any time and without prior notice. In no event will responsibility or liability be accepted for direct, indirect or consequential damages resulting from the use or application of this equipment.

Mises en garde

Les exemples et les schémas de ce manuel ne sont donnés qu'à titre illustratif. Les informations présentées dans ce manuel peuvent être modifiées sans avis préalable. En aucun cas nous n'assumons la responsabilité ou l'obligation pour les dommages directs, indirects ou consécutifs qui résultent de l'utilisation ou application de cet équipement.

Short Circuit

Motortronics soft starts are not short circuit proof. After severe overload or short circuit, the operation of the soft start should be fully tested by an authorized service agent.

Court-circuit

Les démarreurs progressifs Motortronics ne sont pas à l'épreuve des courts-circuits. Après une forte surcharge ou un court-circuit, le fonctionnement du démarreur progressif doit être intégralement vérifié par un agent de maintenance agréé.

Safety

• VMX-Synergy Plus™ soft starts contain dangerous voltages when connected to the mains supply. Only qualified personnel that have been completely trained and authorized, should carry out installation, operation and maintenance of this equipment.

• *Les démarreurs progressifs VMX-Synergy Plus™ contiennent des tensions dangereuses, lorsqu'ils sont connectés à la tension secteur. Les activités d'installation, d'utilisation et d'entretien de cet équipement doivent être effectuées par un personnel qualifié, dûment formé et habilité.*

• Installation of the soft start must be made in accordance with existing local and national electrical codes and regulations and have a minimum protection rating.

• *Le démarreur progressif doit être installer conformément au code local et nationale d'électricité et à la réglementation en vigueur, et il doit avoir un indice de protection minimal*

• It is the responsibility of the installer to provide suitable grounding and branch circuit protection in accordance with local electrical safety codes.

• *Il appartient à l'installateur d'assurer la mise à la terre et la protection du circuit de branchement, conformément au code de sécurité électrique local.*

• This soft start contains no serviceable or re-usable parts.

• *Ce démarreur progressif ne contient pas de pièces réparables ou réutilisables*

• The STOP function of the soft start does not isolate dangerous voltages from the output of the soft start. An approved electrical isolation device must be used to disconnect the soft start from the incoming supply before accessing electrical connections.

• *La fonction STOP du démarreur progressif n'isole pas les tension dangereuses en sortie du démarreur progressif. Avant d'accéder aux raccordement électriques, il faut utiliser un dispositif d'isolation électrique approuvé pour déconnecter le démarreur progressif de la tension d'entrée.*

Model Number Description

It is essential to check the VMX-Synergy Plus nameplate and make sure that the soft starter is properly sized for your AC motor.

VMX-SGY-I-17-6-XX-XX

Option

Non-critical customer options
(may be blank)

Control supply U_s

01 – $U_s = 24V_{dc}$, 110VAC or 230VAC

02 – $U_s = 110V_{AC}$

03 – $U_s = 230V_{AC}$

Main Supply voltage

6 – 200VAC to 600VAC, $U_i 600V$

VMX-SGY-I-850

Weight = 54 kg (119 lbs)

Enclosure ventilation

Enclosure Ventilation

When installing a VMX-Synergy Plus™ into an enclosure, ventilation must be provided if the heat output of the unit is greater than the cabinet will dissipate. Use the following formula to determine the fan requirement. An allowance has been incorporated into the formula so that the figure for Q is the air delivery in the fan supplier's data.

Heat dissipated can be approximated with the formulas: -

Starting

Watts (VMX-Synergy Plus™) = start current(A) x start time(s) x number of starts per hour/1200

iERs Disabled

Watts (VMX-Synergy Plus™) = (VMX-Synergy Plus™ current rating) x 0.6

iERs Enabled

The maximum power dissipation occurs when energy saving and the iERS is turned on

Watts (VMX-Synergy Plus™) = (VMX-Synergy Plus™ current rating) x 1.5

$$Q = \frac{4 \times Wt}{(T_{\max} - T_{\text{amb}})}$$

Q = volume of air (cubic metres per hour-m³/h)

Wt = Heat produced by the unit and all other heat sources within the enclosure (Watts)

T_{max} = Maximum permissible temperature within the enclosure (50°C for a fully rated VMX-Synergy Plus™)

T_{amb} = Temperature of the air entering the enclosure (°C)

If you prefer to work in CFM, substitute °F for °C. Q is now in CFM

Enclosure internal clearances

Model	A		B		C	
	mm	inch	mm	inch	mm	inch
VMX-SGY-I-17 to VMX-SGY-I-100	25	0.98	75	2.95	25	0.98

PTC+	3 x PTC in series (130 °C)				

Notes	
#1	The programmed digital input setting on D1-COM, D1-1I, D1-2I must correspond to the voltage applied to these terminals to avoid risk of damage to the equipment. Afin d'éviter d'endommager l'équipement, le réglage de l'entrée numérique programmé sur D1-COM, D1-1I, D1-2I doit correspondre à la tension appliquée à ces bornes.
#2	The programmed digital input setting on D2-COM, D2-1I, D2-2I must correspond to the voltage applied to these terminals to avoid risk of damage to the equipment. Afin d'éviter d'endommager l'équipement, le réglage de l'entrée numérique programmé sur D2-COM, D2-1I, D2-2I doit correspondre à la tension appliquée à ces bornes.
#3	The control supply can be 110 to 230Vac applied to the N, L terminals or 24Vdc applied to the 0Vdc, 24Vdc input terminals. The correct voltage as specified must only be applied to one of these supply inputs to avoid risk of damage to the equipment. L'alimentation contrôle peut être 110 à 230 Vca, appliquée aux bornes N et L, ou 24 Vcc, appliquée aux bornes d'entrée de 0 Vcc, 24 V. Afin d'éviter d'endommager l'équipement, la tension appropriée selon les indications ne doit être appliquée qu'à une entrée d'alimentation.

Control Supply and Control Circuit (Us and Uc)

1) Maximum motor line current indicated. For In-Delta connections, all six motor wires must be available for connection, and it is critical to exactly follow the In-Delta wiring diagram in the Synergy Quick Start Guide. The Soft Starter will only sense the Phase Current, which is about 57.7% of the motor line current.

Overload Trip Curves

Note: When the overload has tripped, there is a forced cooling time to allow the overload to recover before the next start. The 'warm' trip times are 50% of the 'cold' trip time

Technical Information & Standards

Rated operational voltages	U_e	200VAC to 600VAC		
Rated operational currents	I_e	See Rating Table		
Rating index		See Sizing Guide		
Rated frequency		50 - 60Hz \pm 5Hz		
Rated duty		Uninterrupted.		
Form designation		Form 1, Internally Bypassed		
Rated insulation voltage	U_i	600V		
Rated impulse withstand voltage	U_{imp}	Main circuit	6kV	
IP code		Main circuit	IP00 (IP 20 optional on VMX-SGY-I-17 to VMX-SGY-I-195)	
		Supply and Control circuit	IP20	
Pollution Degree		3		
Rated conditional short-circuit current and type of co-ordination with associated short circuit protective device (SCPD)		Type 1 co-ordination See Short Circuit Protection Tables for rated conditional short-circuit current and required current rating and characteristics of the associated SCPD		
Rated control circuit voltage (programmable)	U_c	24VDC, 110VAC or 230VAC		50 - 60Hz \pm 5Hz Protect with UL listed fuse rated max.4A.
Rated control supply voltage	U_s	See Rating Table, 2 Amp supply (cont.)		
Relay specification	11/23, 12, 24 and 33/43, 34, 44 53, 54	AC-15, 230VAC, 1A DC-13 30VDC, 0.7A AC-15, 250VAC, 3A DC-13 24VDC, 2A		
Electronic Overload relay with manual reset	Trip Class	10, 20 or 30 (See Sizing Guide for associated I_e rating)		
	Current setting	10% I_e to I_e		
	Rated frequency	50 to 60Hz \pm 5Hz		
	Time-current characteristics	See Fig.1 for trip curves (Trip time $T_p \pm 20\%$)		
EMC Emission levels	EN 55011	Class A ①		
EMC Immunity levels	IEC 61000-4-2	8kV/air discharge or 4kV/contact discharge		
	IEC 61000-4-3	10 V/m		
	IEC 61000-4-4	2kV/5kHz (main and power ports)		
		1kV/5kHz (signal ports)		
	IEC 61000-4-5	2kV line-to-ground 1kV line-to-line		
	IEC 61000-4-6	10V		
The safety functions were not evaluated by UL.				
Transient surge suppression shall be installed on the line side of this equipment and shall be rated 600_V (phase to phase), suitable for overvoltage category III, and shall provide protection for a rated impulse withstand voltage peak of 6 kV” – or equivalent.				
The control circuits are to be supplied by class 2, limited voltage current or protected by a 4A UL 248 listed fuse.				
Control and auxiliary circuits have an overvoltage withstand capacity of 2.5kV				
① NOTICE: This product has been designed for environment A. Use of this product in environment B may cause unwanted electromagnetic disturbances, in which case the user may be required to take adequate mitigation measures

Size 4

Type designation (eg. VMX-SGY-I-...)			625	722	850
Rated operational currents	I_e	A	625	722	850
Rated conditional short circuit current	I_q	kA	42	42	42
Class L time delay fuse #1	Maximum rating Z_1	A	800	1000	1200
UL Listed inverse-time delay circuit breaker #1	Maximum rating Z_2	A	1000	1200	1200
Semiconductor fuse (class aR) #2	Type		Mersen PC36UD69V**CP1 1 SIBA 20 688 32		
	Fuse rating	A	1800	1800	2000

1. Suitable For Use On A Circuit Capable Of Delivering Not More Than ___ I_q ___ rms Symmetrical Amperes, 600 Volts Maximum, When Protected by Class J or Class L time delay Fuses as indicated with a Maximum Rating of ___ Z_1 ___ or by a Circuit Breaker with a Maximum Rating of ___ Z_2 ___.

2. Correctly selected semiconductor fuses can provide additional protection against damage to the synergy unit. These semiconductor fuses are recommended to provide this increased protection.

Note: For Mersen fuses ** is 18 for 1800A fuse and 20 for 2000A fuse.

Electric current, Danger to life!

Only skilled or instructed persons may carry out the operations.

Lebensgefahr durch Strom!

Nur Elektrofachkräfte und elektrotechnisch unterwiesene Personen dürfen die im Folgenden beschriebenen Arbeiten ausführen.

Tension électrique dangereuse!

Solo persone qualificate e avvertite devono eseguire le operazioni di seguito riportate.

¡Corriente eléctrica! ¡Peligro de muerte!

El trabajo a continuación descrito debe ser realizado por personas cualificadas y advertidas.

Tensione elettrica: Pericolo di morte!

Solo persone abilitate e qualificate possono eseguire le operazioni di seguito riportate.

触电危险!

只允许专业人员和受过专业培训的人员进行下列工作。

Электрический ток! Опасно для жизни!

Только специалисты или проработанные лица могут выполнять следующие операции.

Levensgevaar door elektrische stroom!

Uitsluitend deskundigen in elektriciteit en elektrotechnisch geïnstrueerde personen is het toegestaan, de navolgend beschreven werkzaamheden uit te voeren.

Livsfare på grund af elektrisk strøm!

Kun uddannede el-installatører og personer der er instruerede i elektrotekniske arbejdsopgaver, må udføre de nedenfor anførte arbejder.

Προσοχή, κίνδυνος ηλεκτροπληξίας!

Οι εργασίες που αναφέρονται στη συνέχεια θα πρέπει να εκτελούνται μόνο από ηλεκτρολόγους και ηλεκροτεχνίτες.

Perigo de vida devido a corrente eléctrica!

Apenas electricistas e pessoas com formação electotécnica podem executar os trabalhos que a seguir se descrevem.

Livsfara genom elektrisk ström!

Endast utbildade elektriker och personer som undervisats i elektroteknik får utföra de arbeten som beskrivs nedan.

Hengenvaarallinen jännite!

Vain pätevät sähköasentajat ja opastusta saaneet henkilöt saavat suorittaa seuraavat työt.

Nebezpečí úrazu elektrickým proudem!

Níže uvedené práce směřjí provádět pouze osoby s elektrotechnickým vzděláním.

Eluhtii! Elektrilöögioht!

Järgnevalt kirjeldatud töid tohib teostada ainult elektriala spetsialist või elektrotehnilise instrueerimise läbinud personal.

Életveszély az elektromos áram révén!

Csak elektromos szakemberek és elektrotechnikában képzett személyek végezhetnek el a következőkben leírt munkákat.

Elektriskā strāva apdraud dzīvību!

Tālāk aprakstītos darbus drīkst veikt tikai elektrospeciālisti un darbam ar elektrotehniskām iekārtām instruētās personas!

Poráženie prądem elektrycznym stanowi zagrożenie dla życia!

Opisane poniżej prace mogą przeprowadzać tylko wykwalifikowani elektrycy oraz osoby odpowiednio poinstruowane w zakresie elektrotechniki.

Livsfara genom elektrisk ström!

Pavojus gyvybei dėl elektros srovės!

Tik elektrikai ir elektrotechnikos specialistai gali atlikti žemiau aprašytus darbus.

Poráženie prądem elektrycznym stanowi zagrożenie dla życia!

Opisane poniżej prace mogą przeprowadzać tylko wykwalifikowani elektrycy oraz osoby odpowiednio poinstruowane w zakresie elektrotechniki.

Življenjska nevarnost zaradi električnega toka!

Spodaj opisana dela smejo izvajati samo elektrostrokovnjaki in elektrotehnično poučene osebe.

Nebezpečnostv ohrozenia života elektrickým prúdom!

Práce, ktoré sú nižšie opísané, smú vykonávať iba elektroodborníci a osoby s elektrotechnickým vzdelaním.

Опасност за живота от електрически ток!

Операциите, описани в следващите раздели, могат да се извършват само от специалисти-електротехници и инструктиран електротехнически персонал.

Atenție! Pericol electric!

Toate lucrările descrise trebuie efectuate numai de personal de specialitate calificat și de persoane cu cunoștințe profunde în electrotehnică.
